FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF SECRETARY

Re: Compatibility Between Cable Systems and Consumer Electronics Equipment
ET Dkt. No. 93-7 (Implementation of Section 17 of the 1992 Cable Act)

As owners and users of TVs and VCRs, we join the **Consumer Federation of America** and the **Home Recording Rights Coalition** in supporting measures to eliminate the cable monopoly over set-top boxes and to foster an open market for cable-related consumer devices. We applaud the Commission for its efforts to date in promoting compatibility between cable services and consumer-owned equipment. We respectfully urge the Commission to continue its pro-consumer efforts and enact the following measures in its next round of rulemaking:

- ◆ **Prohibit scrambling on all regulated tiers of cable service that were not scrambled before the enactment of the 1992 Cable Act**, so cable companies cannot impose new set-top devices or other equipment on subscribers whose service is unchanged.
- ◆ **Separate signal access control functions from other functions provided by set-top boxes**, so that except for descrambling modules, we can purchase fully capable set-top boxes, TVs and VCRs at retail.
- ◆ **Establish standards for digital cable transmission**, including a national renewable security standard, so in the future we can buy compatible TVs, VCRs and other equipment without having to rent any access devices from cable or other network operators.
